Foreword

The papers in this volume were presented at the *14th Canadian Conference on Computational Geometry* held August 12-14, 2002 at the University of Lethbridge, in Alberta. There were 39 papers accepted and participants attended from several countries. The breadth and depth of the papers indicate that CCCG continues to be a favoured and valuable forum for researchers in computational geometry to present their work. One purpose of CCCG is for authors to receive feedback from the computational geometry community at an early stage of research. It is typical that most of the papers presented at CCCG eventually appear in a more complete form in a refereed journal. The papers appearing in this volume are also available in electronic form at the conference web site `http://www.cs.uleth.ca/~wismath/cccg`.

Thanks to all the authors who submitted papers and presented their work, and especially to our invited speakers:

- Stan Wagon, (*Macalester College, MN*)
- Ulrich Kortenkamp (*Freie Univerisität Berlin, and Cinderella*) and
- Luc Devroye, (*McGill U.*) who gave the Paul Erdös Memorial lecture.

Many thanks are due to the program committee for their detailed evaluations of the submitted abstracts. Ray Dufresne and Jon Wilsdon helped with much of the local organization.

CCCG02 was financially supported by: CRM, the Fields Institute, PIMS, and the University of Lethbridge. Their support is gratefully acknowledged.

Stephen Wismath
(Program Committee Chair)

Program Committee

Therese Biedl, *University of Waterloo*,
David Bremner, *University of New Brunswick & Technische U. München*,
Hazel Everett, *LORIA & University of Nancy, France*,
Mark Keil, *University of Saskatchewan*,
Alex López-Ortiz, *University of Waterloo*,
Thomas Shermer, *Simon Fraser University*,
Sue Whitesides, *McGill University*,
Stephen Wismath, *University of Lethbridge*.
